Grand Touring® Series

GTO Amplifiers

FEATURES

New Quality
- All GTO amplifiers feature a full aluminum heatsink (and aluminum feet) for significantly improved thermal performance. They also come with high-quality terminals for reliable connections.

New Value
- All multichannel amplifiers offer electronic crossover networks for all channels and auxiliary outputs (except GTO5355) for convenient system expansion. All subwoofer amplifiers now offer our proprietary Dynamic Bass Optimization, which perfectly combines a subsonic filter with variable bass boost. The subwoofer level remote is now included in all subwoofer amps and the 5-channel model.

New Electronics
- New GTO is less noisy and produces less distortion for perfect sound quality.

New Elegance
- The new design offers reduced height and less footprint than previous GTO amps.

New Illumination
- The dual LED light bars and the backlit JBL logo on the new GTO amps give any trunk a nice, white ambient light.
